

Task 3: Platforms Exploration

In this task I checked out coding practice platforms and collaboration tools.

I made an account on HackerRank. Did a beginner problem.

This helped me see how these platforms improve problem-solving skills and programming knowledge.

I also made a Google Form called "Digital Literacy Awareness Quiz" with five questions about internet safety and digital tools.

I looked at the responses in Google Sheets.

It showed me how to collect organize and analyze data easily.

This task was really helpful.

It introduced me to digital platforms that support learning.

Coding platforms improve thinking and programming skills.

Tools like Google Forms and Sheets are great for working and managing data.

I think these tools will be important in my studies.

They will help me handle tasks better.

Coding platforms and tools, like Google Forms will help me a lot.

Google Forms and Sheets are useful tools.

HackerRank is a coding platform.
